

# ELELE

**Build! Learn! Play! Smile!**

## The Wolfelele Is Here In Australia!

The **Wolfelele** is a **build-it-yourself ukulele** that is designed to be put together on a kitchen table in a couple of hours. The finished product is a real instrument that will provide many hours of lasting pleasure.

The Australian **Wolfelele** kit contains just about everything you need – pre-cut wooden parts, pre-assembled fret board, tuning pegs, glue, Aquila strings, sandpaper, sanding block and instructions. You provide a Phillips head screw driver and your choice of decoration. No fancy tools or wood working skills are required.

Check out the assembly instructions [www.scorpex.net/Uke/Wolf\\_Instructions.pdf](http://www.scorpex.net/Uke/Wolf_Instructions.pdf)

A **Wolfelele** takes shape.....

A few hours later – finished!

## YOU CAN DO IT!

The distinctive triangular shape of the **Wolfelele** is based on the Canadian Northern ukulele that featured in the great documentary The Mighty Uke.

**The Wolfelele is available in three sizes**

Soprano (smallest) Concert (middle size) Tenor (largest)
